Q:

My system stopped at the stacker in an Unload. How can I activate the shovel to check if the the shovel is positioned correctly?

A:

Here is the sequence to move the shovel:

FW Version <=6x

```
WR DM123 63450      ; Activate service mode
ST 1701             ; shovel out
RS 1701             ; shovel in
WR DM123 0          ; Leave service mode
```

FW Version 7ff

```
WR DM123 63450      ; Activate service mode
ST 1401             ; shovel out
RS 1401             ; shovel in
WR DM123 0          ; Leave service mode
```
